[Alcohol intoxication - Wikipedia](#)

Alcohol intoxication is the negative health effects due to the recent drinking of ethanol (alcohol). When severe it may become a medical emergency. Some effects of alcohol intoxication, such as euphoria and lowered social inhibition, are central to alcohol's desirability.

[Alcohol Toxicity and Withdrawal - Special Subjects - Merck ...](#)

Alcohol (ethanol) is a CNS depressant. Large amounts consumed rapidly can cause respiratory depression, coma, and death. Large amounts chronically consumed damage the liver and many other organs. Alcohol withdrawal manifests as a continuum, ranging from tremor to seizures, hallucinations, and life

[Alcohol intoxication - an overview | ScienceDirect Topics](#)

Alcohol intoxication. Alcohol intoxication is a significant risk factor for TBI, and TBI should be appreciated as a heterogeneous, dynamic pathophysiological process that occurs at the moment of impact and continues over time with sequelae potentially seen many years after the initial event (Currie et al., 2016).

[Treatment of Alcohol Intoxication and Alcohol Withdrawal ...](#)

In most instances, the first step in the treatment of individuals with alcohol use disorder is the identification of intoxication or withdrawal states. Once intoxication or withdrawal is recognized, the clinician must understand the principles of managing either state. The general management includes assuring the safety of the patient by understanding the clinical course of withdrawal and [UpToDate](#)

The health effects of chronic alcohol abuse, the recognition and management of alcohol withdrawal, and ethanol intoxication in children are discussed separately. (See "Management of moderate and severe alcohol withdrawal syndromes" and "Ethanol intoxication in children: Epidemiology, estimation of toxicity, and toxic effects".)

[What Is Substance Intoxication Delirium? - Verywell Mind](#)

Whether the delirium starts during intoxication or withdrawal, it will usually subside within hours or days of ceasing to take the drug, although in withdrawal, delirium can sometimes last for weeks. Delirium usually develops over a fairly short period of time, ranging from a few hours to a few days.

[Alcohol Withdrawal and Intoxication | EMS Reference](#)

Alcohol Intoxication. Ethanol is an organic compound that is typically ingested in liquid form. Ethanol is only one of many types of alcohols, although in popular reference the term alcohol is synonymous with ethanol.

#### **An Approach to Drug Abuse, Intoxication and Withdrawal ...**

Alcohol intoxication rarely requires treatment, but it may precipitate seizures by lowering the seizure threshold level. Because the symptoms of alcohol withdrawal are related to a relative drop

#### **Alcohol and anaesthesia | BJA Education | Oxford Academic**

Alcohol withdrawal is a potentially life-threatening complication that must be diagnosed and actively managed. Anaesthetists are as susceptible to alcohol-related disease as others in the same socio-economic group.
