If You Have Head or Neck Cancer - American Cancer Society

If You Have Head or Neck Cancer: What is head and neck cancer? Cancer can start any place in the body. Cancer that starts in the head and neck can have many names. It depends on where the cancer starts. All of these cancers start when cells in part of the head or neck grow out of control and crowd out normal cells. This makes it hard for the body to work the way it should. Cancer cells can

Head and neck cancer - Wikipedia

Head and neck cancer is a group of cancers that starts in the mouth, nose, throat, larynx, sinuses, or salivary glands. Symptoms for head and neck cancer may include a lump or sore that does not heal, a sore throat that does not go away, trouble swallowing, or a change in the voice. There may also be unusual bleeding, facial swelling, or trouble breathing. About 75% of head and neck cancer is
