A reduction semantics for channel interaction, in contrast, would be more complex; due to tunneling, interacting particles could be located far away in the structure of a term. Evolvable hardware is quite popular right now; more than fifty research groups are spread out over the world. Evolvable hardware has become a part of the curriculum at some universities. Evolvable hardware is being commercialized and there are specialized conferences devoted to evolvable hardware. On the other hand, surprisingly, we can feel the lack of a theoretical background and

In this blog I want to introduce you to the concept of Event-Based Components (EBC) in Software development to develop better evolvable software. This concept is pretty good known in the C# community. But how about ABAP? I tried it out and want to share my experiences with this approach. If we want
