IFTF: Forecasting the Internet
Forecasting the Internet: IFTF Celebrates Paul Baran Paul
Baran brought one of the first projects to IFTF in 1971. It
was based on a grant from ARPA, the Defense Department
's Advanced Research Projects Agency, to build a
prototype of the Arpanet, the world's first working packet
switching network and the core network of a set that came
to compose the global Internet.

Internet in 1995 by that time a mature Internet system was
in place in the United States. Pool, in his telephone
assessment, determined that visionary consideration to the
telephone stopped when telephones penetrated a

significant number of American homes.

Forecasting the Internet | SpringerLink

Demand forecasting is a perilous undertaking even in the best of circumstances, as when there is a well-defined product (or service), a stable environment, and lots of historical data. At the present time, the Internet has none of these characteristics. The products and services are ill-defined, the

How to Choose the Right Forecasting Technique

To handle the increasing variety and complexity of managerial forecasting problems, many forecasting techniques have been developed in recent years.

Demand Planning & Forecasting | ToolsGroup

Demand Planning & Forecasting Businesses complexity is growing, driven by multichannel marketing, the growing influence of demand shaping (media, promotions, new product introductions), and the impact of internet buying behavior.

Forecasting - Wikipedia

Forecasting is the process of making predictions of the future based on past and present data and most commonly by analysis of trends. A commonplace example might be estimation of some variable of interest at some specified future date.
