Chapter 1 of Information Systems for Business and Beyond

Information systems hardware is the part of an information system you can touch the physical components of the technology. Computers, keyboards, disk drives, iPads, and flash drives are all examples of information systems hardware. We will spend some time going over these components and how they all work together in chapter 2.

INFORMATION SYSTEMS MATURITY IN E-BUSINESS

E-Business Information Systems (eBIS) are Information Systems (IS) that support organizations to realize their e-Business strategy resulting in various benefits. Therefore those systems strongly focus on fulfilment of the e-business requirements.
