(PDF) LPV Systems with Parameter-varying Time Delays ...

In this paper, we address the analysis and state-feedback synthesis problems for linear parameter-varying (LPV) systems with parameter-varying time delays.

Multiple model approach to linear parameter varying time ...

This paper is concerned with the identification problem of linear parameter varying (LPV) time-delay systems. Due to inherent nonlinearity, the industrial processes are often approximately described by an LPV model constructed by synthesizing multiple local models.

Linear Parameter-Varying Models - MATLAB & Simulink

A linear parameter-varying (LPV) system is a linear state-space model whose dynamics vary as a function of certain time-varying parameters called scheduling parameters. In MATLAB , an LPV model is represented in a state-space form using coefficients that are parameter dependent.
