Perspectives in Multilevel Decision-making in the Process Industry (5/34 Figure 3. Planning matrix (Meyr et al.,2015) 2 Modeling Structure Network Supply chains are systems with multiple components that interact exchanging information. Thus, a network representation is ideal to represent the structure and interactions between each of the decision-making components. In this section we propose A multi-level decision making model for the supplier ... We extend and present an approach to solving multilevel decision-making problems when fuzzy constraints are employed. Different scenarios are constructed within a numerical illustration, based on the selection of controlling factors by the upper level decision makers.
