[An Overview of Natural Toxins in Food - efs.gov.hk](#)

Natural toxin of animal origin may be a product of metabolism or a chemical that is passed along the food chain. While poisoning after eating terrestrial animals is relatively uncommon, poisoning due to marine toxins occurs in many parts of the world. Marine toxins produced by toxic microalgae are accumulated in shellfish.

foodsafety.asn.au Natural toxins in food

Natural toxins in food. Food contains natural chemicals, including carbohydrates, sugars, proteins and vitamins. But some foods contain potentially harmful natural toxins. Sometimes a toxin is present as a naturally occurring pesticide to ward off insect attack or to protect the plant from spoilage when damaged by weather, handling, UV light or microbes. Your own sensitivity to a natural toxin
