## OPTIMIZATION ON METRIC AND NORMED SPACES

We begin the study of minimization problems on normed spaces and metric spaces with a discussion of penalty methods in constrained optimization (Chapters 2 and 3).

Optimization on Metric and Normed Spaces:

Alexander J ...

"Optimization on Metric and Normed Spaces" is devoted to the recent progress in optimization on Banach spaces and complete metric spaces. Optimization problems are usually considered on metric spaces satisfying certain compactness assumptions which guarantee the existence of solutions and convergence of algorithms.

We begin the study of minimization problems on normed spaces and metric spaces with a discussion of penalty methods in constrained optimization (Chapters 2 and 3). Penalty methods were one of the first methods employed for solving constrained minimization problems about 60 years ago. According to these methods instead of solving a constrained minimization problem we solve a penalized
