Stationarity and convergence in reduce-or-retreat ... Stationarity and Convergence in Reduce-or-Retreat Minimization presents and analyzes a unifying framework for a wide variety of numerical methods in optimization. The author's "Reduce-or-retreat" framework is a conceptual method-outline that covers any method whose iterations choose between reducing the objective in some way at a trial point, or retreating to a closer set of trial points. The

Stationarity and Convergence in Reduce-or-Retreat Minimization Additional info for Stationarity and Convergence in Reduce-or-Retreat Minimization Sample text The result follows from Proposition 14 after we show that the iterates X_k are eventually contained in B_5 and the result will follow since we always have $X_k \leq F_{\max} F$ by the definition of F_{\max} .
